Respected sir,

This mail informs that I came across the work of Mr. Debi Prasad Sahoo who is working as a research scholar under your supervision and also interested in field of application of machine learning in the water resources.
It is quite fascinating and also I am interested in working in the field of application of machine learning in the water resources.
Recently, We have already discussed the demand of the project and proposed a tentative project title as "Ensemble Machine Learning algorithm for high frequent discharge estimation in a scantily gauged river".

With your due permission, I am eagerly waiting to work on this project under your guidance as an in-house project, which starts from December 13, 2021. This will help me to improve my skills in the direction of research as well as in computer programming.

Kindly find my curriculum vitae attached with this mail for your reference.

Regards
Sachin Agarwal
